

## Homegrown

Our manufacturing facility is located in Fergus, Ontario - just an hours drive from the GTA. It's 66,000 square feet of highly efficient departments to produce our high quality product lines; the Bulldog Heat Pump and the Compax Modular Chillers.

*A local name you can trust.*

CGC Group of Companies, Inc. is a Canadian design, manufacturing and distribution group dedicated in making energy efficient commercial HVAC products. Our Bulldog Heat Pumps and Compax Modular Chillers are hard-working, less hassle products that protect against changing customer demands, shrinking floor plans, rising energy costs, fast build schedules, and tighter maintenance time-lines. We are fiercely Canadian and proudly stand by our Canadian made products. We welcome you to take a short drive to Fergus for a tour.

Committed to the Environment  
Solar PV panels on the roof and low watt LED lighting fixtures throughout the entire facility.

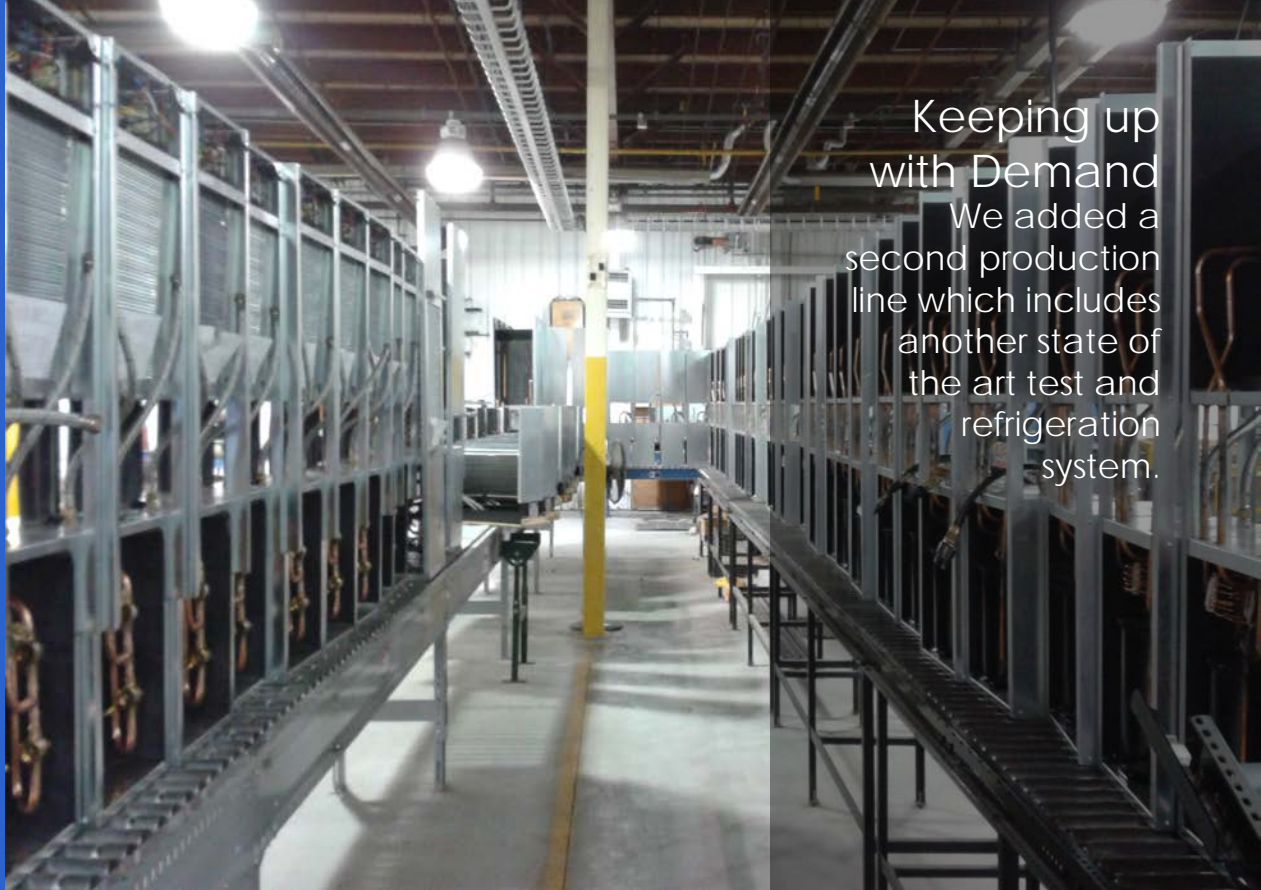

*Proud Makers of:*

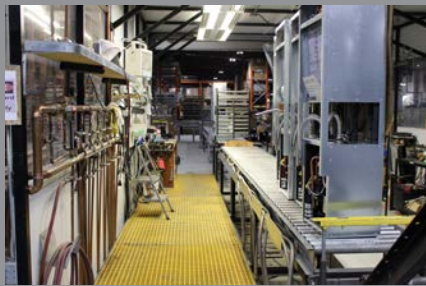

Each and every unit is thoroughly tested for quality and performance.

Keeping up with Demand  
 We added a second production line which includes another state of the art test and refrigeration system.

State of the Art  
 We use the advanced technologies of Trumpf machines for custom punching and bending our own sheet metal.
