

16 storey building with 210 suites including some live/work units and 12,000 square feet of street-level shops.

Geothermal heating and cooling system (Geothermal pump operated by solar panels will transfer water up and down the tower via pipes in the ground to heat the building in the winter and cool it in the summer)

Solar panels pre-heat the hot water tanks as well as support the electrical needs of geo-thermal heating and cooling system.
